City Project 24909 – Crystal Lake Water Quality Improvements and Lakeview Terrace Park Redevelopment – Resident Comment Opportunity

Earlier in the year, City staff prepared plans and sought public comment for the proposed redevelopment of Lakeview Terrace Park. Following a Public Hearing on the proposal, the City Council at its meeting of May 12th 2009, approved a layout for the park redevelopment.

City Council then sought to undertake a critique of the layout from an independent Landscape Architect to see if the layout could be further enhanced. Part of the critique involved the review of all resident comments received during the initial public consultation period.

City staff have now received two concept layout plans for comparison against the originally approved layout, and we wish to receive your comments about these. The plans will be on display at City Hall during office hours from now until 4:30pm on Monday November 16th. The plans will also be available for review on the City website during this time.

We welcome your review of these plans and would be happy to discuss them with you. We will have comment sheets available at City Hall for your written input, or you can email your comments to us. All comments should be received by us during the review period.

A report on the proposals and comments received will be presented to City Council at its meeting on December 1st. The adoption of the final layout is anticipated to be made at that meeting in order to allow detail construction plans to be prepared over winter.

If you would like to discuss this issue, or have any questions about the proposal, please contact me on ☎ 763-531-1260 or by email at rmccoy@ci.robbinsdale.mn.us.

Yours sincerely

Richard McCoy, P.E.
Public Works Director / City Engineer
