

Robbinsdale 2018 Fall Bareroot Tree Species Availability for Boulevard (Right of Way) Plantings

*Tree availability mostly ranges in groups of 5 or 10; trees are bareroot and range from 5 to 8 feet tall at planting time; whips indicate very limited branching; to request tree(s) for planting this fall adjacent to your stretch of public right of way (or 'boulevard' if you have a sidewalk) please contact City Forester Stephan Papiz at 763-531-1273 or at spapiz@ci.robbinsdale.mn.us
